# CONTENTS

## Elysian I

P06-P07

Embrace the minimalist allure of Elysian I, where simplicity meets sophistication. Designed for those who appreciate clean lines and timeless elegance. This shower door enhances any bathroom with its understated charm and impeccable craftsmanship.

## Elysian II

P08-P09

Add a blend of modern flair and nostalgic charm with the Elysian II, featuring its unique Flywheel Design. Inspired by classic memorabilia like Grandma's sewing wheel and Grandpa's fishing reels, this fixture combines timeless craftsmanship with contemporary style.

## Elysian III

P10-P11

Industrial strength meets modern design with a sprocket-inspired pattern, robust materials, and a sleek matte finish. Elevate your space with sophisticated, durable style.

## Novel

P12-P13

Its precision engineering and sleek, minimalist design offer effortless operation and easy access, transforming your shower into a serene sanctuary. With durable construction and luxurious finishes, the Novel door combines functionality with a touch of relaxation.

## ELYSIAN SLIDING SHOWER DOOR COMMON FEATURES

All hardware is made of SS304 stainless steel

**BelloGlide™**

**ANSI**  
Z97.1 certified  
2406.11-CPSC 16 CFR 1201

These standards ensure the quality control of our glass doors and our tempered glass is safe, strong and durable

**Premium quality glass**

**BelloShield™**  
GLASS COATING

coating on glass doors is designed to eliminating the buildup of mildew, soap scum and water stains for a cleaner and clearer appearance with much less cleaning.

Treated Glass

Untreated Glass

**BelloShield™**

**BelloFlexWidth™**

**BelloSoftclose™**

**BelloLeakfree™**

### Innovative Features

- **BelloGlide™**

BelloGlide™ is an innovative silent roller system with premium quality ball bearings which can glide smoothly, quietly and stably to make the opening and closing effortless. Gliding operation is extremely quiet and safe, transforming every shower into a moment of luxury. The innovative roller design simplifies installation and provides out-of-plumb/uneven walls adjustability even if the sliding glass door is installed.

- **BelloShield™ coating**

Bello's exclusive and innovative glass coating applied with Nano technology for a cleaner and clearer appearance, designed to eliminating the buildup of mildew, soap scum water spots and water stains. BelloShield™ coating features hydrophobic properties that cause water to bead and flow off quickly, effectively carrying away soap scum, dirt, grease, and stains. With this coating, shower glass doors require about 10% of the cleaning needed for untreated glass, significantly reducing both the frequency and effort required to keep them looking pristine. Enjoy a cleaner, more maintenance-free bathroom with BelloShield™.

- **BelloLeakfree™**

The advanced BelloLeakfree™ technology creates tight seals around all edges, expertly managing water flow and preventing leaks for a consistently dry bathroom. Specially designed vinyl seals and a water deflector work together to redirect water back into the shower area, while a waterproof anti-splash threshold further prevents spills. With BelloLeakfree™, you can enjoy a dry bathroom floor with confidence.

- **BelloFlexWidth™**

BelloFlexWidth™ technology provides up to 4 inches of width adjustment for a perfect fit. The heavy-duty stainless steel top guide rail supports significant weight and features an anti-jumping design. Both the top rail and bottom threshold can be trimmed up to 4 inches, while the SS304 stainless steel wall profile allows for 3/8 inch adjustments for out-of-plumb walls, ensuring seamless installation.

- **BelloSoftclose™**

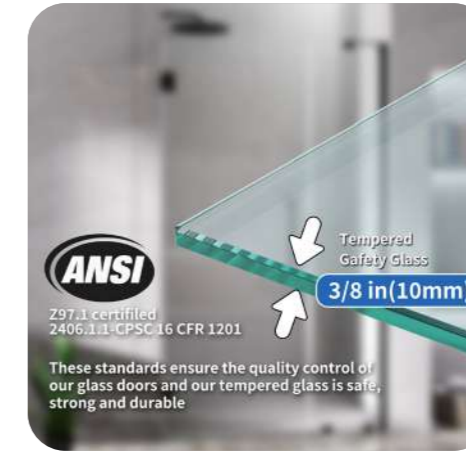

BelloSoftclose™ is our innovative double-dampening technology, and soft closes are pre-installed on the top rail, softening the door's impact on walls for a smooth open-and-close experience. It ensures a tight seal to prevent water spills while bringing the door to a secure close without slamming, providing exceptional water containment for your bathroom. Enjoy a seamless and enjoyable experience with every use.

## NOVEL HINGED SHOWER DOOR COMMON FEATURES

All hardware is made of SS304 stainless steel

**BelloSofttech™**

**ANSI**  
Z97.1 certified  
2406.11-CPSC 16 CFR 1201

LEFT HAND OPEN

RIGHT HAND OPEN

**Reversible installation**

**BelloShield™**  
GLASS COATING

coating on glass doors is designed to eliminating the buildup of mildew, soap scum and water stains for a cleaner and clearer appearance with much less cleaning.

Treated Glass

Untreated Glass

**BelloShield™**

**Up to 1 inch width adjustment**

**BelloLeakfree™**

### Innovative Features

- **BelloSofttech™**

The innovative and patent soft close feature can soften the door impact on closure for smooth open and close, which gives you an enjoyable moment. It can also keep the door closed tightly free of water spills, and bring your door to a secure close without slamming, also provides exceptional water containment.

- **BelloShield™ coating**

Bello's exclusive and innovative glass coating applied with Nano technology for a cleaner and clearer appearance, designed to eliminating the buildup of mildew, soap scum water spots and water stains. BelloShield™ coating features hydrophobic properties that cause water to bead and flow off quickly, effectively carrying away soap scum, dirt, grease, and stains. With this coating, shower glass doors require about 10% of the cleaning needed for untreated glass, significantly reducing both the frequency and effort required to keep them looking pristine. Enjoy a cleaner, more maintenance-free bathroom with BelloShield™.

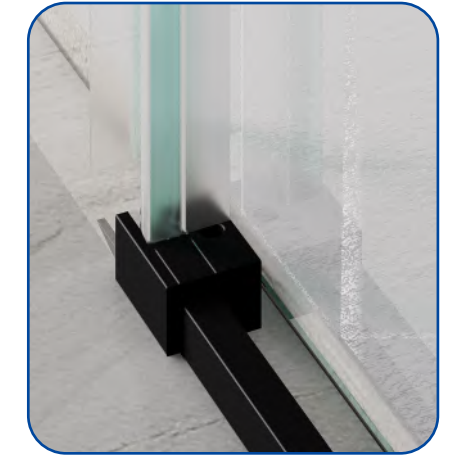

- **BelloLeakfree™**

The advanced BelloLeakfree™ technology creates tight seals around all edges, expertly managing water flow and preventing leaks for a consistently dry bathroom. Specially designed vinyl seals and a water deflector work together to redirect water back into the shower area, while a waterproof anti-splash threshold further prevents spills. With BelloLeakfree™, you can enjoy a dry bathroom floor with confidence.
